

# Our Connections

Our partners have been chosen because they share our passion for the best in design, function and durability. By combining our collective experience, you're assured of the highest quality storage solutions.

#### Azko Nobel - A world class finish

The best office storage solutions demand the best surfaces, which is why we've partnered with Akzo Nobel and their world-class Interpon Powder Coatings range. As market leaders in architectural, automotive, appliance and industrial powder coatings, Azko Nobel have the experience to provide the highest quality finishes. And if you happen to require a customised colour to create that perfect look, Azko Nobel offer a colour-matching service for just about every surface. Talk to us for more details as some conditions do apply.

All powder coatings manufactured locally by Akzo Nobel are lead-free and do not contain TGIC. Contact us for a copy of the relevant Material Safety Data Sheet.

# Elite Built Colour Selector

Colours displayed within this card should be used as a guide only. Every effort has been taken to match Interpon production standards under daylight conditions. Due to the nature of the printing process, some degree of colour and gloss level variation may occur. Where more than one finish is available, product colour may vary. We recommend that you use samples prepared on our production line for final colour selection on approval. Please contact a representative for more information.

Unless otherwise agreed by us in writing, any contract to purchase products referred to in this brochure and any advice which we give in connection with the supply of products are subject to our standard conditions of sale.

# Colour Your World

At Elite Built, we've created a contemporary range of colours for you to choose from that have been designed to perfectly complement every one of our modern storage solutions.

#### The smarter way to work for over 50 years

For over half a century, Elite Built have been working with Australian businesses by providing a high quality range of beautifully designed and practical storage solutions. From small home-based offices, through to multi-national corporate spaces, our products are designed to function seamlessly with your working environment by creating space and better efficiency. This philosophy is driven by our continual pursuit of innovation, so much so that our filing cabinet is the only Australian Made range to receive the highly regarded AFRDI accreditation AS5079.

#### Colour options

Colour plays a vital role in creating the right office ambience. At Elite Built, we understand this principle and in this chart you'll find a selection of colours that work perfectly with your storage solution. From modern neutral palettes, to more striking tones you're sure to find the perfect look.

#### Care & Maintenance

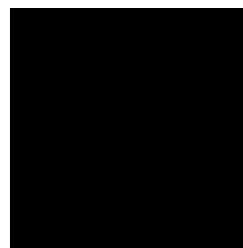

Elite Built products are manufactured to the highest standards, so naturally when it comes to looking after the durable powder coated surface of our products, we've made it easy. By simply wiping surfaces down with a soft cloth and using a weak solution of household detergent, you'll keep your product in optimal condition. Avoid using abrasive cleaning products, strong chemicals and cleaning solutions as these may damage the powder coated surface. The specially formulated powder coated surface is designed for normal office use and direct sunlight may affect colour intensity over time. Feel free to ask us for further care advice.

# Committed To Sustainable Solutions

At Elite Built we're committed to providing clients with the very best in sustainable storage solutions. Outlined below is a summary of the Elite Built Sustainability Policy. We're committed to;

- Using the best environmentally considerate products available
  - Minimising waste and production emissions
  - Using energy and resources smartly
  - Reusing and recycling resources
  - Communicating our sustainability commitment through marketing and print material
  - Continuous improvement of our Environmental Management System
  - Participating in government supported environmental protection initiatives
  - Complying with environmental legislation and industry codes of practice
  - Educating employees and contractors about our sustainability philosophy
  - Encouraging participation from employees, customers and suppliers in formulating environmental policies
- Our Elite Repeat program is an initiative ensuring all our products are managed responsibly throughout their lifecycle; we've made it our responsibility to care for them after you're through with them. Sustainability is at the heart of our business, which is why we've developed the Elite Repeat initiative. It lets you recycle Elite Built products through selected distributors, so we're able to minimise our impact on the environment.
- Participating products include:
- Mobile Pedestals
  - Tambour Door Cupboards
  - Lateral Filing Cabinets
- The Elite Repeat program reuses, disassembles and recycles these products for use in other steel products so that together we can all work toward a greener future.

## Our Certification

Quality is at the heart of everything we do, so naturally our Australian manufacturing and process is in accordance with the International Standard ISO 14001:2004 and ISO 9001.

### ISO 9001

ISO 9001 is the internationally recognized standard for the quality management of our business. By adopting this accreditation we're showing our commitment to quality, customers, and a willingness to work towards improving efficiency. Implementing a Quality Management System (QMS) highlights deficiencies and therefore allow immediate actions to improve efficiency and productivity. We're able to develop procedures that result in less waste, inappropriate or rejected work and fewer complaints. As a valued Customer, you'll notice that orders are met consistently, on time and to the correct specification.

### ISO 14001: 2004

ISO 14001:2004 is the International Standard for Environmental Management Systems (EMS) adopted to assist us in identifying areas of our operations that have the greatest potential for impact on the environment. Through the EMS we are able to monitor how effective our programs have performed and allow us to prioritise the areas of operations that need more attention. Every aspect of our Environmental Management System covers how we operate as both a business and a manufacturer. Our commitment and determination to maintain and improve our environmental practices allow us to stay focused on our environmental principles. All manufacturing plants in Australia that manufacture Elite Built products achieved the accredited ISO 14001:2004 International Standard.
